USE CASE #	Sequence of Play
Goal in Context	Define turn structure for each player in order of actions
Scope & Level	
Preconditions	1st run: start of game actions have been, subsequent runs: previous player completes their instance of sequence of play
Success End Condition	Player successfully has had the opportunity to receive or perform all actions in the sequence of play, and checks for game win conditions.
Failed End Condition	Player does not have an opportunity to complete all actions, game does not properly check game win conditions.
Primary Actors	Players, Actions
Secondary Actors	

Trigger	Start of game actions completed, or previous player completes sequence of play without winning game	
DESCRIPTION	Step	Action
	1	Collect Income
	2	Draw a Card
	3	Take two actions
	4	Take free actions
	5	Transfer money
	6	Take special-power actions
	7	Add targets
	8	Check if game won
EXTENSIONS	Step	Branching Action
	2a	Draw a group card: Group Card Drawn
	2b	Draw a special card: Special Card Drawn
	6b	Illuminati is the Bermuda Triangle: The Bermuda Triangle Power
	6d	Illuminati is the Gnomes of Zurich: The Gnomes of Zurich Power
SUB-VARIATIONS	Step	Branching Action
	1	none
RELATED INFORMATION		
Priority:	high	

Performance	Medium, turns progress at the pace of players therefore should be smooth enough on execution but there is more room for pause
Frequency	Looping, continuous as many times as players continue to need to take turns to achieve victory
Channels to actors	
OPEN ISSUES	
Due Date	July 3, 2019

USE CASE #	Take Actions Phase
Goal in Context	Allow Player to take two actions on their turn, or any player to perform free actions
Scope & Level	A driving component of each player's turn.
Preconditions	Draw a Card in sequence of play complete
Success End Condition	Player is able to properly execute the appropriate number of actions of their choice during their turn
Failed End Condition	Player cannot appropriately make all actions or actions are not executed properly
Primary Actors	Player

Secondary Actors	None	
Trigger	Draw a card in sequence of play complete	
DESCRIPTION	Step	Action
	1	Prompt user to select one action from the list: Regular Action, Free Action, Pass.
	2	Response is recorded and action is taken.
	3	If "Pass" is not selected and less than two regular actions have been taken, User is prompted to select from Regular Action, Free Action, and End turn.
	4	Step 3 is repeated and action is performed until it cannot run or "End turn" is selected.
	5	If "End turn" is not selected, User is prompted to select from Free Action and End turn.
	6	Take action, Repeat step 5 if Free Action performed.
EXTENSIONS	Step	Branching Action
	2a	If regular action is selected, Regular action use case triggered.
	2b	If free action is selected, Free action use case triggered.
	2c	If pass is selected, Pass use case triggered.
	3a	If pass was selected, use case ends.
	4a	If regular action is selected, Regular action use case triggered.
	4b	If free action is selected, Free action use case triggered.
	4c	If end turn is selected, the use case ends.
	6a	If free action is selected, Free action use case triggered.
	6b	If end turn is selected, the use case ends.

USE CASE #	The Attack	
Goal in Context	Allows a player to perform an attack	
Scope & Level	The implementation of an attack requested by a user through a Regular action	
Preconditions	The attacking player is known, must have card that can attack	
Success End Condition	All users are given sufficient options in an attacking scenario.	
Failed End Condition	Potential attacking options between players are unexplored or the result is incorrect.	
Primary Actors	Player currently taking turn	
Secondary Actors	All players	
Trigger	Attack is selected from Regular action	
DESCRIPTION	Step	Action
	1	User indicates the group used for the attack from the their power structure.
	2	User indicates the player and group they wish to attack. Must not be a player's illuminati card.
	3	The user indicates whether the attack is to: Control, Neutralize, or Destroy
	4	The user is asked if they wish to make their attack privileged.
	5	Power Modifiers are applied to the involved attacking group.

	6	All players are invited to abolish privilege and interfere.
	7	The attacker is asked if they wish to cancel the attack.
	8	Generate a roll.
	9	Calculate the outcome of combat.
	10	Take appropriate action based on combat outcome.
EXTENSIONS	Step	Branching Action
	4a	If the user would like to make the attack privileged they must indicate a card to discard from their hand. The Bavarian Illuminati may instead pay 5MB.
	4b	If the user does not want to make the attack privileged nothing happens.
	5a	Illuminati specific power buffs are applied to the attacker or defender power appropriately.
	5b	Group special power buffs/nerfs are applied to the attacker or defender respectively.
	5c	Attacking player asked if they wish to aid an attack triggering Aiding attack use case if answered 'yes'.
	5d	Attacker, then defender, are given the opportunity to increase their power by 1 for each MB spent from their illuminati or group treasury. The defenders group treasury can increase power by 2 per MB. This loops until both players decide to not take this opportunity.
	6a	If attack is privileged, all players are given the chance to give up two special cards to abolish privilege from this attack.
	6b	If attack is not privileged, all players may interfere. To interfere, a player gives up 1 MB to change a power score by 1.
	6c	If interference occurs, revert back to step 5d.
	7a	If an attack is canceled, the attack ends.
	9a	If the roll was an 11 or 12, the defender wins.

	10a	On a failed attack, nothing happens.
	10b	On a successful attack, effects trigger based on the user's answer to step 3.
	10b.1	On an attack to control, the defending group is given to the attacker and move group use case triggers.
	10b.2	On an attack to neutralize, the defending group is moved to the uncontrolled section.
	10b.3	On an attack to destroy, the defending group is moved to the destroyed group pile.
